# PROBLEM

---

- Lack of a centralized system for campaign operations
- Difficulty in tracking pilgrim services and records
- Manual processes increase errors and delays
- Limited communication between campaign staff and pilgrims

# SOLUTION

---

This project aims to improve food safety and pilgrims' health during Hajj by providing a smart system that monitors meals, kitchens, and health data, and uses AI to predict and prevent health risks.

# PROJECT FEATURES

---

- Campaign management
- Health record management
- Kitchen and Meal tracking
- Violation system
- Role-Based access control

# AI FEATURES

---

- Meal suitability validation
- Campaign risk assessment
- Inspector performance evaluation
- Multi-language guidance

Thank you  
for your attention
